The Student Health Service of Washington University Medical Campus provides both on and off campus psychological counseling services, offering you many options. Your wellness and privacy is always our goal.

For your convenience and privacy the Student Health Service Counseling Service has a separate office space located on the first floor of our building. Dr. Allyson Bass, Licensed Staff Psychiatrist, Dr. April Allen, Licensed Staff Psychologist, Dr. Kenton Wertman, Licensed Staff Psychologist, and Dr. Gladys Smith, Sexual Violence Prevention Therapist and Licensed Psychologist are available by appointment only. The Student Health Counseling Service is located at 4525 Scott Ave, 1st floor, Suite 1154, call for an appointment is (314) 362-2404.

A student does not need to see the Director or one of the physicians at the Student Health Service for a referral to see a Psychologist or Counselor. An interaction with a Student Health Service physician or mental health provider is necessary before seeing a Psychiatrist for evaluation and/or triage for efficiency in obtaining an appointment.

Student Health Service makes every effort to ensure the student’s privacy. Records regarding psychiatric or psychological care are kept separate from the student's regular medical chart. A student’s provider is the only individual with access to these records.

The initial assessment session is provided free of charge. For subsequent visits, a student pays a $10.00 co-payment directly to their provider. Research demonstrates that some financial contribution increases a student’s investment in counseling. Students are charged $40.00 for appointments missed without proper notice.

Students are encouraged to make an appointment with one of the physicians at Student Health or talk to one of the nurses if they are having difficulty making an appointment or not pleased with the evaluation and/or treatment. Psychological concerns maybe treated with counseling, medication alone, or both in combinations. Primary care physicians at Student Health are comfortable evaluating the appropriateness of medication.

In addition, Student Health Service has partnered with ENI, a Balance Works benefit, Student Assistance Program (SAP) for all enrolled students and their immediate family members. This service is provided to enable students to obtain the best possible education and assist with issues that may have an impact upon your personal live and your school performance.

Students are also encouraged to seek the support of peer groups such as Student Support Services and the Student Advisory Committee. These groups seek to provide an avenue by which students can learn to balance their own needs in the midst of their graduate training.

A detailed description of these benefits can be found on the Student Health Service web-site: http://wusmhealthservices.wustl.edu.
